EDUCATION

Louisiana State University

MBA, Finance - May 2009

B.S., General Studies - Dec 2006

STATEMENT

I am a web developer with a background in business and finance. I enjoy the development process and I look forward to working with others while creating user friendly web applications.

EXPERIENCE

United States Treasury - Office of Financial Research 4/2013 - Present Senior IT Specialist

- Development of the OFR Data Catalog to manage dataset metadata and process workflows using Ruby on Rails, Bootstrap, jQuery, Blacklight, and Solr
- Development of the Personal Identity Verification data synchronization system for automation and management of employee Active Directory, Exchange, and Skype accounts using Ruby on Rails, Redis, Resque, LDAP, WinRM, and Powershell
- Configuration and management of full stack environments including Nginx, Apache, Postgres, and Redhat Linux servers
- Configuration and implementation of automated provisioning via continuous integration pipelines using Git, Atlassian Bamboo, and Capistrano, complete with automated unit tests using RSpec
- Work with business analysts and testers to determine requirements and acceptance criteria as outlined per the Agile development framework

United States Treasury - Office of the CIO 9/2010 - 4/2013 IT Specialist

- Administration of Sharepoint 2010 site collection for 16 offices
- Conducted Sharepoint site administrator user training for 16 offices
- Administration and development of BMC Remedy ticketing, incident, asset, change, and task management systems
- Development of PIV data synchronization system for automation and management of employee Active Directory, Exchange, and Lync accounts using IBM Tivoli Identity Manager

ACS Creative 9/2009 - 9/2010 Lead Developer

- Wordpress site administration, theme development, and plugin modification
- Worked with a team of 11 different web designers to transform their photoshop designs into templated Wordpress themes
- Management of over 50 client websites hosted on Rackspace
- Implemented basic software development practices including version control, backup policy, stack standardization, and incremental development
